LANGUAGES

Persian — Native
English — B1+ (preparing for an official certificate)

FIELDS OF INTEREST

Computer Science
Artificial Intelligence
Machine Learning
Robotics & Embedded Systems

PROFILE

High school graduate in Network & Software with a diploma GPA of 18.57/20. Interested in Computer Science and AI, with practical experience building Android applications, web platforms, and software for robotics and environmental-monitoring projects.

EDUCATION

High School Diploma — Network & Software

Abuzar Technical & Vocational School, Isfahan, Iran | 2023–2026
Overall diploma GPA: 18.57 / 20

SELECTED PROJECTS

HamrahMadrese — Educational Marketplace | 2026

Developed and deployed an educational marketplace using Django, Python, and MySQL. Implemented core platform functionality including account authentication, phone OTP verification, educational product/content management, Zarinpal payment integration, digital purchases and downloads, and production deployment/maintenance.

Focus Leaf — Android Productivity App | Independent project | 2026

Android app to help users manage focus goals and reduce distractions. Built with Kotlin and Android development tools; documented features include timed focus sessions, Deep Focus mode, selection of allowed apps, short breaks, emergency unlock, and a dark UI.

FIRST Global Challenge — Team Iran | 2025–2026

Contributed software for Team Iran's competition robots across two seasons. Experience includes Java/OnBot Java, motor and servo control, holonomic drive, IMU-based movement, AprilTag-related functions, and autonomous robot behavior.

PyroGuard — Wildfire Sensor / IoT Project | 2025

Worked on sensor-node communication and embedded IoT software for an environmental monitoring concept, using Arduino/C++ and sensor data transmission as part of a team project.

Simorgh — Wildfire-Risk Monitoring Platform | 2026

Developed web-platform components for an environmental monitoring project, including a sensor dashboard and wildfire-risk visualization features. Project concepts include combining field sensor readings with vegetation information for risk awareness.

Smart Boom — University of Isfahan Internship | 2024

Implemented Kotlin login and registration interfaces as part of an internship project under supervision.

ADDITIONAL PROJECTS

Flower & Plant Shop — Android App | Personal project

Developed an Android shopping application using Kotlin.

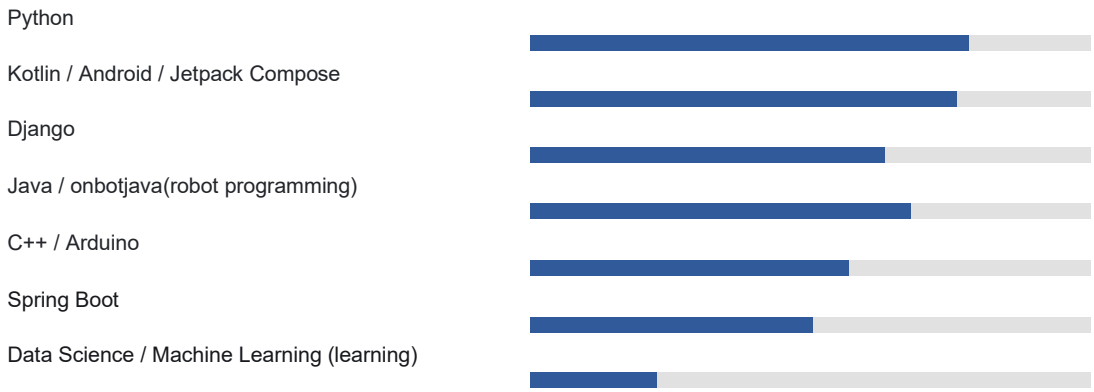

Currency Tracker & Notes Apps | Personal projects

Built small Android applications for tracking currency information and managing notes.

ACHIEVEMENTS & AWARDS

- Silver Medal — International Tournament of Engineering (ITE), London, 2023; team award.
- Silver Award — New Tech Experience (NTE), FIRST Global Challenge 2025; Team Iran award.
- Silver Award — Courageous Achievement, FIRST Global Challenge 2025; Team Iran award.

TECHNICAL SKILLS

Other tools and technologies: MySQL, SQLite, Git & Github, Postman, Android Studio, IntelliJ IDEA, VS Code, Arduino, ESP32, and PlatformIO.

Aspiring Computer Science / Artificial Intelligence Undergraduate

ADDITIONAL EXPERIENCE & ACTIVITIES

- Volunteer Instructor – Taught introductory technical concepts to young children during a summer program.
- Installed and maintained classroom projectors (data show units) and computers at school.
- Completed a summer internship in the R&D department of Snowa Tech.
- Completed a First Aid training course with the Red Crescent Society.
- 2nd Place, School Video Game Competition.
- Completed training programs in Karate, Table Tennis, Volleyball, Chess, and Bodybuilding.
- Plays the Santur (traditional Persian hammered dulcimer).
